Professional Summary

System Owner with **3 years of fintech** experience across **e-wallet, cross-border payments and chargeback platforms**. Led chargeback operations handling **1M+ cases annually** with a **99.89% completion rate** across **Visa and Mastercard channels**. Experienced in restructuring core processing systems, building intelligent dispute capabilities and driving operational efficiency improvements.

Work Experience

Ant International **Kuala Lumpur, Malaysia**

Tech: Java, MySQL, REST APIs, JSON, ElasticSearch, Git, MsgBroker (Kafka), SofaBoot (SpringBoot), microservices

System Owner – Chargeback Team 06/2025 – Present

- Governed **1M+ annual chargeback cases**, ensuring compliance with an average handling time of **1.39 days** and a **99.89% completion rate**.
- Led restructuring of a **core chargeback processing system** to improve maintainability and risk monitoring.
- Achieved a **31.4% chargeback success rate**, with total business volume increasing by **9.3%**, chargeback channel operations by **29%**.
- Improved operational efficiency by **30%**, reducing required manpower from **13.2 to 9.3** and improving exception-handling efficiency by **22.59%**.

Pre-quote settlement Project

- Contributed to the development of a **pre-quote settlement chargeback feature**, applying the transaction-date exchange rate for specific chargeback scenarios.
- **Analysed and restructured existing chargeback flows** to integrate the new feature, ensuring seamless processing and system stability.
- Collaborated cross-functionally to **validate business logic** and edge cases before rollout.

Java Software Engineer – Wallet Tech Team 12/2024 - 06/2025

- Supported backend ownership for **cross-border payment modules**, ensuring reliability and transaction accuracy.
- Developed **APIs for auto-debit unbinding and cross-role card sharing**, coordinating requirements across multiple teams to ensure consistent behavior across user roles.

Axiata Digital **Kuala Lumpur, Malaysia**

Tech: Java, MySQL, REST API, JSON, Git, Kafka, Jenkins, microservices

Associate Software Engineer *11/2022 – 11/2024*

- Orchestrated product enhancement initiatives and achieved an average of **4K transactions per week**.
- Achieved over **1M** premium users and close to **9M** basic users on the e-wallet app, resulting in a total Gross Transaction Value (GTV) of **~RM23M**.
- Facilitated the generation of **1.6M** DuitNow touchpoints for merchants

International E-Wallet Project

- Engineered a seamless integration of a Prepaid Mastercard – Beyond Card for an e-wallet, enabling domestic and international transactions.
- Successfully onboarded approximately **20K users** to-date.

Education

Asia Pacific University of Technology & Innovation **Kuala Lumpur, Malaysia**

Bachelor of Science (Honours) in Software Engineering *04/2019 – 11/2022*

- CGPA – 3.41

Certificates & Awards

- LFD121: Developing Secure Software
- Microsoft Certified: Azure Fundamentals
- King Scout Holder
